1: Placement opportunities for Post Graduate students according to their Fields of specialization especially.

Probable solutions - Inviting companies and preparing a database for the students for an easy approach for them to recruit throughout the year and telling about our specialization and field of work since many of the branches are not known to the industries outside. Linking industries and companies is also a big achievement if we could solve it.

2: Beautification of the places along with many roads and other sides of it as well since it's like a forest which can be utilized for different purposes.

Probable solutions: Places like in front of Brahputra hostel and side of that and both sides of many roads in IIT campus is really like forest and it can be utilized like parks or sitting places and for other exhibition purposes as well

3. Internships and mentorship for PG students: As many of the students are from out of IIT and they come from various backgrounds from different parts of the country. They don't have proper guidance on how to build their intrapersonal skills as well as soft skills as well as profiles to apply for various places.

Probable solutions: Bringing inline & in accordance with the mainstream & giving guidance on each and one aspects may solve the problems and can also make the opportunities available equally for PG students who are coming from different backgrounds on the basis of GATE examination as well as some other examinations.

4. A store/hub for chemicals used frequently should be there to avoid lagging in the research scholars with the funds for research.

Probable solutions: The details can be asked to every lab and a database for the chemicals as well can be brought for research purposes which is used frequently and a store can be created for that. The amount paid at the time for purchasing chemicals can be given at the time of getting the chemicals from the store as well.
