AGENDAS

1. Mid sem break !!– I propose to provide mid sem breaks to help students to be stress free.Studying straight for 4 months with so many courses, projects, club activities puts a lot of pressure and learning can never take place in a stressful environment hence mid sem breaks are really important.

2.One stop website for all the clubs – Making a one stop website would make clubs more accessible and open to students. Our Outlook mail is already overburdened by mail regarding courses, symposiums..... so many a times we skip important mails from clubs. Also, there are instances we need a right person to discuss about the club but we can't find the appropriate guy. These problems will no longer exist after building a one stop website.

3. Increasing the faculty advisor vs student ratio –. The current faculty advisor student system is not effective, hardly any student approach the faculty advisor for solution of their problem. Assigning one faculty advisor to a group of 5-6 students can provide personalized attention and really turn this system to a boon for students.

4. Training cells – Making training cells to provide mock interviews, group discussion and mock coding rounds to improve the chances of grabbing an internship or placement in a big tech.

5. Formation of new club for GRe,Gmat ,UPSC etc. aspirants- A major section of campuss junta prepares for these competitive exams , forming a club will give a boost to their preparation. Forming a club can make the availability of exam related resources much easier, would give students a platform where they can discuss their problems with others. There can also be live sessions with alumni who successfully aced these exams.

6.   Make up labs for ALCHERINGA and TECHNICHE members during fests - The ALCHERINGA and TECHNICHE members face a lot of trouble managing time between academics and fests, so I propose that these members get some relaxation in labs during the days of fest and can cover them later by makeup labs.

7.   4 Days in a month full refund of mess food in case one doesn't wish to have food in the mess.
